

FIT3179

Data Visualisation 2

Five Design Sheets

Student Name: Richard Hua

Student Number: 32484003

IDEAS

Total Renewable Energy Production 2020

Number of Renewable Energy Products 2020

Region - Production and Consumption

Renewable Energy Growth

Percentage Growth

Stacked Version

FILTER

Filter unclassified data ①

- Choropleth Map showing renewable energy product data

②

- Show region production and consumption

③

- Show 'top X' countries that produce where it is rough

④

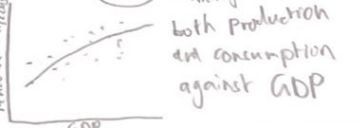

- Line chart showing progression of renewable energy growth

⑤

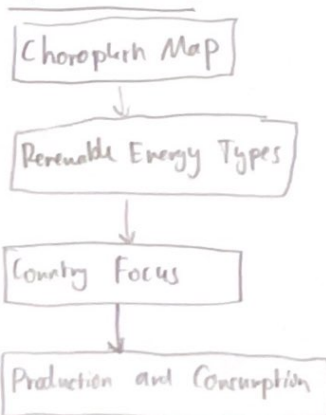

- Show which regions produce different renewable energy

⑥/⑦

- Analysis on both production and consumption against GDP

CATEGORISE

COMBINE AND REFINE

- Choropleth Map
 - ↳ Showcase which countries have high/low renewable energy ①
- Renewable Energy Types
 - ↳ Line chart showing growth of each renewable energy ④
 - ↳ Show each regions' renewable energy ⑤
 - ↳ See pattern

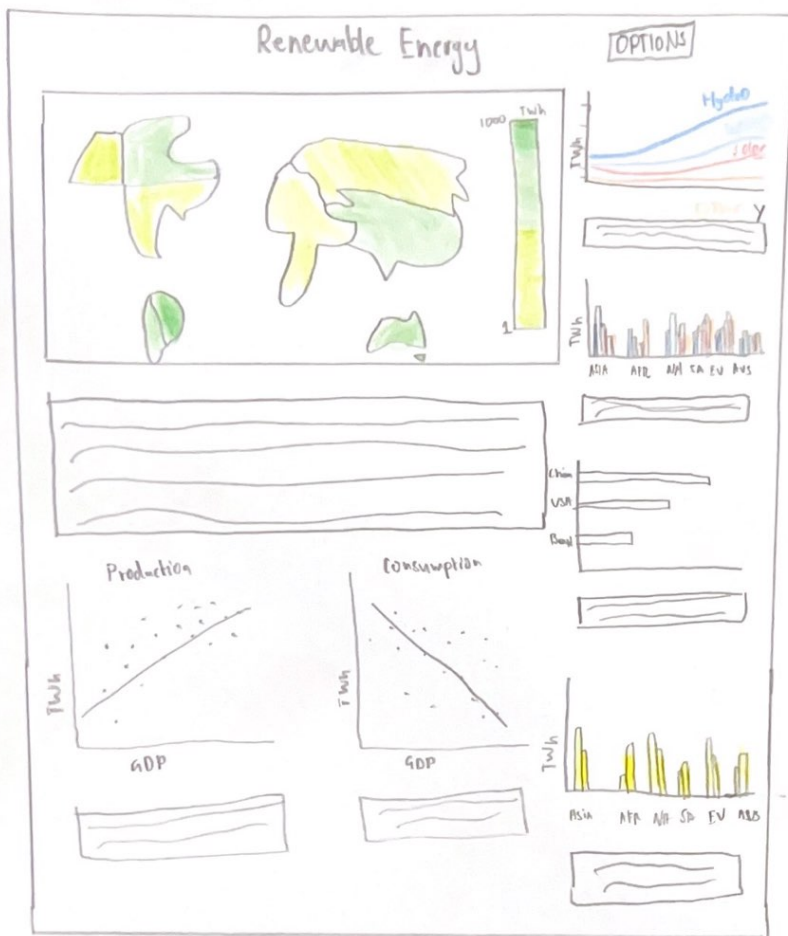

Country Focus

- ↳ Highlight top 5/10 countries that produce most renewable energy ③
- Production and Consumption
 - ↳ Regions production and consumption ②
 - ↳ Scatterplot analysis of GDP vs Production/Consumption of energy ⑥/⑦

QUESTIONS

- Any interactivity for the user?
- Does coding appropriate?
- Is two scatterplot needed? what info will 'get'?
- What annotations can I do?

LAYOUT

Title: Renewable Energy around the World

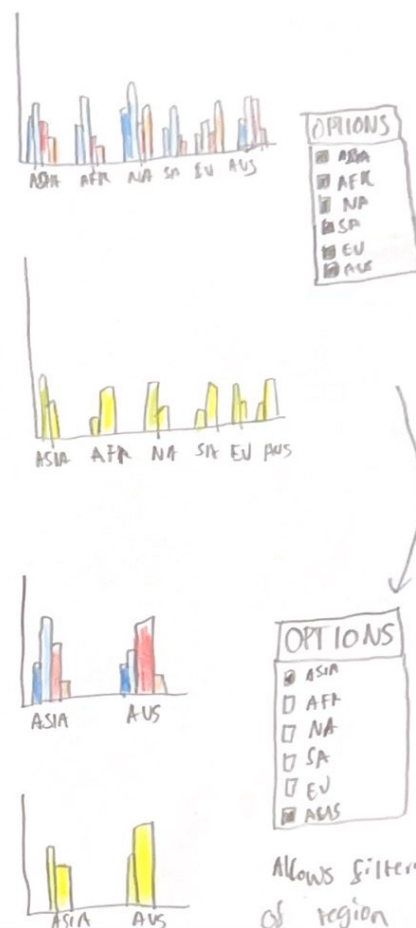

Author: Richard Hua

Date: 14/09/2024

Sheet: 2

Task: FIT3179 Ass2 - Map Focus

OPERATION

FOCUS

Main focus is the choropleth map of renewable energy production

DISCUSSION

Advantages

- ↳ Main focus on choropleth map
- ↳ Has filtering option of regions

Disadvantages

- ↳ Side graphs are also important, but shown smaller
- ↳ Spacing is not good, looks clunky

LAYOUT

Renewable Energy

Choropleth Map

Renewable Energy Types

Country Focus

Production and Consumption

Title: Renewable Energy around the World

Author: Richard Hunt

Date: 14/09/2024

Sheet: 3

Task: FIT3179 Ass2 - Sequential story

FOCUS

Each topic has each focus/section
↳ divided by sub-headings

Each graph has text to explain the content and what the data means
↳ Regional trends, renewable energy types

OPERATION

Similar to Sheet 2 operations

DISCUSSION

Advantages

- ↳ All charts are focused and have their own text
- ↳ Layout has clear flow/story, with subheadings

Disadvantages

- ↳ May be too much info/overwhelming?
- ↳ Boring interactive features

LAYOUT

Renewable Energy

choropleth Map

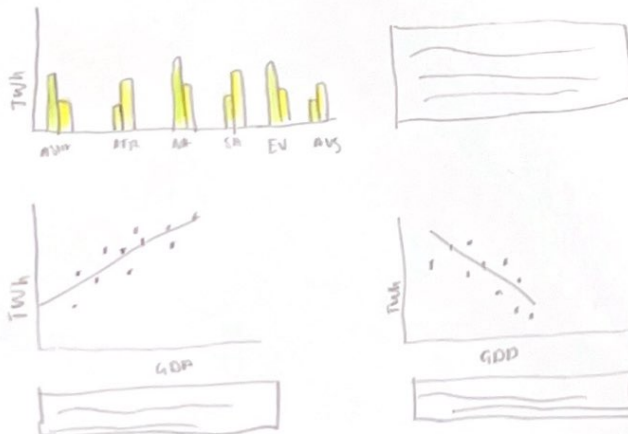

Renewable Energy Types

Country focus

Production and Consumption

Title: Renewable Energy around the World

Author: Richard Hua

Date: 16/09/2024

Sheet: 4

Task: FIT3179 Ass 2 - Type Focus

FOCUS

This vis focuses on an individual renewable energy type

↳ Once selected, it highlights that type of renewable energy

OPERATION

Once image is clicked it switches to that type for all possible graphs

EXAMPLE

DISCUSSION

Advantages

↳ Focuses on each renewable energy type

↳ See how regions produce

↳ Can gain insight

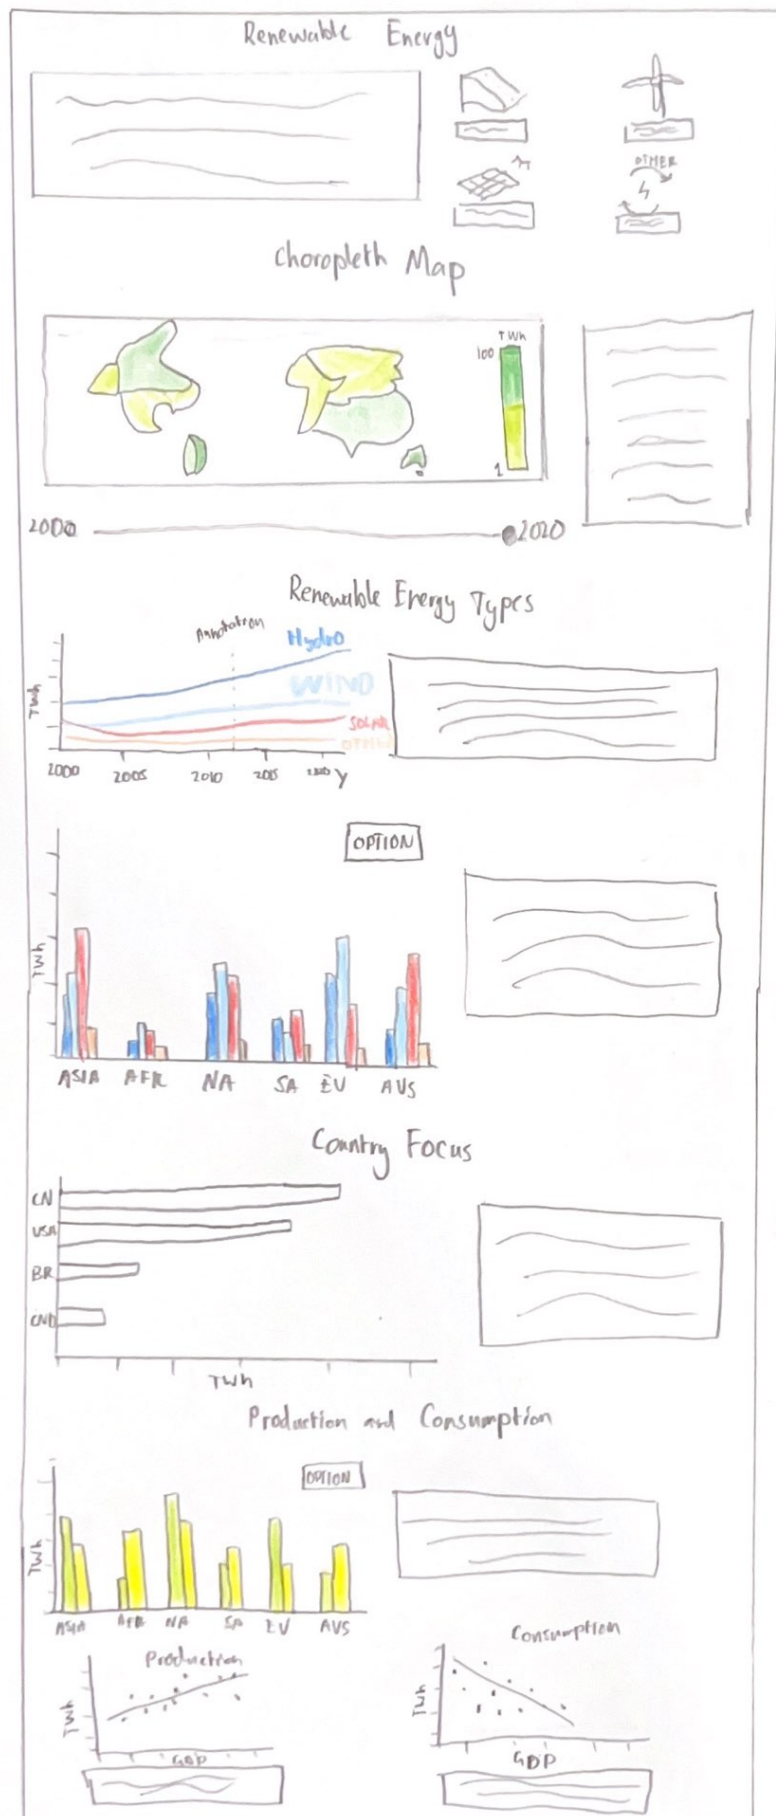

↳ Clear flow/layout

Disadvantages

↳ No overall total production

↳ May be overwhelming/confusing

LAYOUT Based off of Sheet 3

Title : Renewable Energy around the World
 Author : Richard Hui
 Date : 17/09/2024
 sheet : 5

Task : FIT3174 Ass2 - Final Design

FOCUS

No main focus, each topic has its own subsection and corresponding text that explains
 ↳ Countries, region, what areas produce what

Potential annotation to explain why line chart grew? etc.

Colours chosen well and not mixed

OPERATION

2000 ————— 2020
 2010

choropleth map slider to allow user to view year differences

OPTION

- ☒ ASIA
- ☐ AFR
- ☐ NA
- ☐ SA
- ☐ EU
- ☒ AUS

Drop down options bar for bar charts, allow user to select certain region / continent and compare

Tool tips

- ↳ Clear and concise
- ↳ Visual hierarchy → weighted

DETAIL

- Kaggle and 'Our World in Data'
- Use of Vega-Lite
- Estimated 3 weeks to complete
 - ↳ 75 hours for idious
 - ↳ ~ 10 hours for formatting
- Single URL on Gitt-Hub
- Standard Webpage size → CSS
 - ↳ Scroll up and down
